

A young girl with dark hair in a ponytail, wearing a white shirt with blue trim, is sitting at a desk in a classroom. She is looking off to the side with a thoughtful expression. Other students are blurred in the background.

## Science For A Better Life

Why do birds sing? Why does water turn to ice? Why does my heart beat? Nothing is as exciting as science when you experience it firsthand. As scientists do. Thinking critically, working in teams, adapting to change. That is exactly what the Bayer *Making Science Make Sense*<sup>®</sup> program is all about. An initiative aimed at advancing science education through hands-on science programs, employee volunteers and public awareness.

Bayer supports these programs in communities around the world. In the United States, employees adopt classrooms, mentor students and are part of a national movement to reform science curriculums in schools. It's about inspiring the next generation of innovators and building a scientifically literate citizenry. [www.BayerUS.com](http://www.BayerUS.com)
