

BECAUSE

Our CAUSE is Natasha and her rheumatoid arthritis

For more than 30 years, Genentech has been at the forefront of the biotechnology industry, using human genetic information to develop novel medicines for serious and life-threatening diseases. Today, Genentech is among the world's leading biotech companies, with multiple therapies on the market for cancer and other unmet medical needs.

Our employees cite the chance to make a difference in the lives of patients as the number one reason they enjoy working at Genentech. In hiring new employees, we look for people who are inspired by this mission and who would fit in well with the collaborative, rigorous and entrepreneurial spirit of the company culture.

In January 2007, Genentech was named to FORTUNE'S list of the "100 Best Places to Work For" for the ninth consecutive year.

Because we know that employees are critical to our success in bringing novel medicines to patients, we are dedicated to remaining a great place to work and to providing employees with programs, services and benefits that allow them to bring the best to the business and to their personal lives.
