The Power of Dreams

At Honda, our success was literally built on a dream – the 1949 Dream motorcycle. Since then, we've dedicated our resources, talents and energies to creating tomorrow's technologies and giving today's visionaries a place to grow. Now, the power of our dreams is driving careers. Here we strive to provide an atmosphere that stimulates the creativity and productivity of all associates while respecting individuals in a team-oriented management system. We encourage our associates to explore new approaches to business challenges and share in the pursuit of excellence. After all, to build the safest, most innovative products available, you need the most innovative people.

## DESIGN ENGINEERS RESEARCH ENGINEERS

---

Our success is built with a hands-on approach beginning with concept generation and continuing through the finished vehicle. All this is made easier by our proximity and accessibility to Honda's manufacturing facility.

Be part of the excitement. If you are interested in a career at Honda, send your resume, to: **Human Resources, Honda R&D Americas, Inc., 21001 State Route 739, Raymond, OH 43067-9705.
